

Water Recycling System

Transforming the Way You Test !

Our water recycling system provides constant pressure, filtered water for your water penetration tests. This environmentally friendly system recycles thousands of gallons of water that would otherwise go down the drain. This system has a computer interface with is controlled by our automated fenestration test equipment. Think "green" with a system designed by ATS.

Key Features to consider:

- 500 gallon storage tank provides filtered water to spray racks
- High capacity industrial water pump provides a constant, reliable pressure source
- Bypass dump system minimizes spray rack bleed down
- Computer interface with manual bypass feature
- Quick disconnect fittings allow for easy hose storage

Other Products and Systems:

- Air-Water-Structural System
- Test Wall System
- Spray Rack System (mobile / stackable)
- Digital Deflection Measurement System
- Impact Cannon (large / small missile)
- Hurricane Cycling System
- Portable Test Kit (field, lab or in-line)

Water Recycling System
(provides constant pressure filtered water during a water penetration test)

500 Gallon Storage Tank
(feeds our computer controlled pump system)

Our Mission Statement

"To Deliver High Quality, Cost Effective, User-Friendly Automated Test Equipment with Integrity"

Automated Testing Solutions, Inc

8301 Sunset Rd
Spring Lake Park, MN 55432
