

Water Spray Rack System

Transforming the Way You Test !

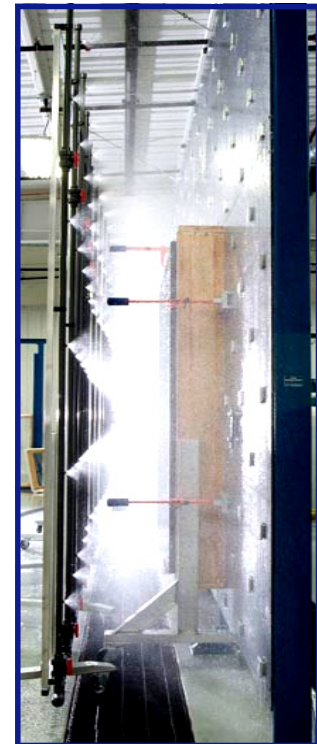

Our mobile stacking spray rack system is designed to place a constant uniform water spray on the test unit. Multiple shutoff valves allow control of both horizontal and vertical spray areas. Multiple spray racks can be daisy-chained to cover large areas. Our racks are built for the rigors laboratory testing and will provide years of reliable performance.

Key Features to consider:

- *Lightweight yet sturdy stacking system saves space and can be removed from the test area*
- *Multiple shutoff valves control vertical and horizontal spray areas*
- *Corrosion resistant materials used throughout*
- *Large orifice spray nozzles minimize clogging*
- *Modular design for daisy-chaining of rack units*
- *Spray properties meets the requirements of fenestration test standards*
- *Optional computer interface allows for spray control via ATS equipment*

Other Products and Systems:

- *Air-Water-Structural System*
- *Test Wall System*
- *Digital Deflection Measurement System*
- *Water Recycling System*
- *Impact Cannon (large / small missile)*
- *Hurricane Cycling System*
- *Portable Test Kit (field, lab or line)*

Spray Racks

*(provides uniform spray over large areas
can be supplied with house water
supply or optional recycling system)*

Mobile Spray Racks Stored

*(our spray racks stack neatly and can be
rolled away from the test area)*

Our Mission Statement -

“To Deliver High Quality, Cost Effective, User-Friendly Automated Test Equipment with Integrity”
